Profile

I am a Computer Science student interested in software development and practical problem solving. I enjoy learning new technologies through hands-on projects and continuously developing my programming skills. I am motivated to expand my knowledge and apply my skills to real-world challenges.

Experience

C++/Python/OpenCV/NumCpp/NumPy

- C++ Implementation – Reimplemented the application in modern C++ using OpenCV and NumCpp, introducing multithreaded processing for computationally intensive image-processing operations and improving application performance.
- Python Prototype – Participated in the development of a Python-based image-processing tool using NumPy, OpenCV and Tkinter, contributing to selected components responsible for Bayer RAW image processing and image enhancement.

Key Projects

Planer – React/JavaScript/Spring Boot/PostgreSQL | 2026 - now

https://github.com/PBujak1/planner-front

- Full-stack system for building layout management and room reservations in an institutional setting. Users browse and filter rooms, check availability for a date range and submit reservations, which go through an approval workflow (pending / approved / rejected / cancelled).

E-recepta - Java/JavaFX/Spring Boot/PostgreSQL | 2025 - now

https://github.com/PBujak1/E-recepta

- IT system for electronic prescription management with role-based access. Doctors can review patient medical history, including diseases and allergies, issue prescriptions, and access visit records with specific dates. Patients can schedule medical appointments and request prescription renewals through the system.

Forget Me Not – React Native/Expo/TypeScript | 2026 - now

https://github.com/PBujak1/forget-me-not

- Mobile app prompting users with random notifications to add dated memories (text and photos) with private/shared/public visibility and auto-generated photo albums for close contacts.

Parallel Programming - C++/Java/CUDA/OpenCL/MPI | 2025/2026

- Applications for parallel matrix inversion, comparing execution time with sequential computation to study program performance.

E-mail App - Java/Swing/JDBC | 2025

https://github.com/PBujak1/Java_Mail_App

- Desktop application for sending emails, logging into email accounts, and handling attachments.

Image Converter - C++/SDL | 2023-2025

https://github.com/PBujak1/Converter5bit

- Program converting .bmp images to a 5-bit version to reduce file size.

Education

Cracow University of Technology

Field of research - Computer Science in Computer Engineering | Faculty of Electrical and Computer Engineering,

2023-now- 7 semester

Foreign Languages

English proficiency at C1 level

Programming Languages

- C/C++
- python
- Java (Spring/Spring Boot, JDBC, JavaFX, Swing)
- JavaScript/TypeScript
- React/ReactNative
- Html
- Bash
- SQL
- Git

Certificates and Courses

- 2024/2025 Linux Terminal Proficiency, Red Hat
- 2025/2026 JavaFX Framework Proficiency,
- 2026-Present Master Spring Boot 3 & Spring Framework 6 with Java,

Tools

- InteliJ IDE/VSCode
- Oracle/PostgreSQL/MySQL
- ChatGPT/Gemini AI/Cloud AI/Copilot
- Figma/Stitch

Interests

- programming
- embedded
- exploring AI
- gym
- running
- drawing

I consent to the processing of my personal data for the purposes necessary to carry out the recruitment process in accordance with Regulation (EU) 2016/679 of the European Parliament and Council of 27 April 2016 on the protection of natural persons with regard to the processing of personal data and on the free movement of such data, and repealing Directive 95/46/EC (GDPR).
